

Express Scripts Preventive Drug List

HDHP Plans

Effective January 1, 2017

When using a plan with a percent co-insurance instead of flat dollar co-pays, members may benefit from shopping for the lowest cost. In some cases, there may be a difference in cost between mail order and retail pharmacies and between brand prescriptions and their equivalent generics.

This is not an all-inclusive list; only examples of medicines in each category are listed. To check if a specific drug is considered preventive, please call Express Scripts at 1-800-988-1794. Brand name products are in uppercase. This list is periodically reviewed by clinical experts. Medications may be added to or removed from the list based on different factors, including the intended purpose of the medication and its availability.

COVERED AT 100%

These preventive prescriptions are covered at 100% paid by the plan (no member deductible or co-insurance).

Only the preventive strength, dosage, and form of these medicines are covered 100%.
Some strengths or compounded formulations may not be covered under the preventive benefit.
