## **What other health insurance options are there besides coverage through IU?**

Dependents are not required to be covered by the IU-sponsored SAA, Postdoc Fellow, or Fellowship Recipient plans. There are other options available that may be less expensive and more financially advisable for your situation or family. While IU cannot advise on these plans, the below information provides a general overview of other options you may want to consider when looking for coverage for your dependents outside of IU.

- Dependents of international students/scholars at IU may have access to international student/scholar plans. Please contact the international affairs office on your campus for details.
- Dependents of domestic students/scholars may be eligible for a health plan through the Health Insurance Marketplace created under the Affordable Care Act (ACA). Details are available at [healthcare.gov/get-coverage](https://healthcare.gov/get-coverage). Out-of-state students may want to look for a plan in their home state marketplace.
- Students, scholars, or family members may also qualify for Medicaid or the Children's Health Insurance Program (CHIP) through the State of Indiana. If you meet the requirements, it may be advantageous to consider one of these options:
  - [Healthy Indiana Plan \(HIP 2.0\)](#) for individuals that make below a certain income level
  - [Hoosier Healthwise](#) for children, pregnant women, and families
  - [CHIP](#) for uninsured children
  - [Medicaid](#) for low income individuals without medical insurance or adequate medical insurance
- Students can choose to buy a new health plan directly from an insurance company or with the help of an agent or broker. A personal insurance agent may be licensed to sell health insurance and many offer discounts for those that also have auto, renters, or other coverage from the same company. However, tax credits for coverage are only available if for those who enroll through the Health Insurance Marketplace.
